OF ACHIEVEMENT

**TURK
STUDENT
COMMUNITY**

This certificate proudly presented to

Ahmet ÇOLAK

*Led by Lead Instructor **Mehmet ÇELİK**, the recipient has successfully completed a comprehensive 100+ hour technical residency, featuring 31 hours of intensive architectural instruction and extensive hands-on laboratory sessions. This program provides a deep dive into the full lifecycle of production-grade AI, bridging the gap between theoretical research and industrial deployment.*

Issuing Date: 03 March 2026
Certificate No: LLM-2026-0028

TECHNICAL CURRICULUM & CORE COMPETENCIES

October 2025 – February 2026

- **Foundation & Strategy:** Project management for AI, Agile/Scrum, and leadership coordination during the LLM Ideathon.
- **Neural Architectures:** Deep dive into ML/NLP structures, RNNs, and the evolution of Transformer architectures.
- **Fine-Tuning & Optimization:** Mastery of Hyper-parameters, Metrics, and Model Compression (Quantization/Pruning).
- **Cognitive Intelligence:** Engineering Retrieval-Augmented Generation (RAG), LangChain frameworks, and Autonomous Agents.
- **Advanced Alignment:** Implementing Reinforcement Learning (RLHF) and exploring Small Language Models (SLM).
- **Production & Safety:** Full-stack deployment with Docker, Streamlit, and Gradio; ensuring reliability via Guardrails and Sovereign AI principles.
